Abanob Nabeh

Flutter Developer

Cairo, Egypt

+20 122 866 1021 — abanobnabeeeh@gmail.com — [LinkedIn](#) — [GitHub](#)

Summary

Flutter Developer focused on building mobile applications using Flutter and Dart. Experienced in integrating RESTful APIs, Firebase Authentication, and state management solutions such as Bloc and Provider. Familiar with Clean Architecture principles and building responsive, maintainable mobile applications.

Education

Bachelor's in Systems and Information 2021 – 2025

Projects

DarkChat – Chat Application

- Developed a real-time chat application using Flutter and Firebase, implementing authentication, group chats, and state management with Bloc.

DarkStore – E-commerce Application

- Built an e-commerce mobile app using Flutter with a Laravel backend, integrating REST APIs, Paymob payments, and Google Maps services.

iClick – Social Media Application

- Developed a social media app supporting posts, reels, and stories with Laravel backend, SQL database integration, and Firebase Cloud Messaging.

QUIZ – Quiz Game Application

- Created a quiz application with multi-level challenges, category-based quizzes, and local data storage using SQFlite.

Weather Plus – Weather Application (Google Play)

- Developed and published a weather application providing real-time data, multi-day forecasts, and geolocation using REST APIs.
