

Abanob Nabeh

Flutter Developer

Cairo, Egypt — +20 122 866 1021 — abanobnabeeh@gmail.com — [LinkedIn](#) — [GitHub](#)

Summary

Results-driven Flutter Developer with **3+ years** of hands-on experience designing, developing, and deploying production-grade mobile applications for Android and iOS. Proficient in **Flutter & Dart** with strong expertise in RESTful API integration, Firebase services (Authentication, Firestore, FCM), and state management solutions (Bloc, Provider, GetX). Experienced in **Clean Architecture**, agile development practices, and cross-functional collaboration. Published an open-source Flutter package on pub.dev actively adopted by developers. Strong problem-solving skills with a focus on writing clean, maintainable, and scalable code.

Technical Skills

Mobile Development: Flutter, Dart, Android, iOS, Responsive UI, Widget Testing

State Management: Bloc, Provider, GetX

Backend & APIs: RESTful APIs, Firebase Authentication, Cloud Firestore, Firebase Cloud Messaging, Laravel, PHP

Databases: MySQL, SQLite, SQFlite, Cloud Firestore

Tools & Architecture: Git, GitHub, Clean Architecture, Agile, CI/CD

Other Languages: JavaScript, SQL

Soft Skills: Problem-solving, Team Collaboration, Communication, Time Management, Attention to Detail

Experience

Flutter Developer — Freelance

2022 – Present

Mobile Application Development

Cairo, Egypt

- Designed and developed 5+ mobile applications end-to-end using Flutter & Dart, covering domains including e-commerce, social media, real-time chat, and weather.
- Integrated RESTful APIs and Firebase services (Authentication, Firestore, Cloud Messaging) across multiple production apps.
- Implemented state management solutions (Bloc, Provider, GetX) following Clean Architecture principles to ensure scalable and maintainable codebases.
- Published a Flutter open-source package (**paymob_flutter**) on pub.dev, reducing payment integration time for developers to under 3 lines of code.
- Collaborated with backend developers to integrate Laravel APIs, Paymob payment gateway, and Google Maps services.
- Deployed a production app to Google Play Store with real-time geolocation and live weather data via REST APIs.

Open Source

paymob_flutter

May 2026

Flutter Package — pub.dev

[pub.dev](#)

- Published a Flutter SDK for the Paymob payment gateway on pub.dev, enabling developers to integrate card payments in just 3 lines of code.
- Handles the full payment flow: authentication, order registration, and payment key generation.

easy_store

May 2026

Flutter Package — pub.dev

[pub.dev](#)

- Published a Flutter storage SDK on pub.dev that unifies SharedPreferences and SQLite under a single API, eliminating repetitive boilerplate across projects.
- Supports type-safe key-value storage, full SQLite CRUD operations, and multiple database instances with a single `EasyStore.init()` setup.

Projects

Weather Plus
Weather App

Oct 2024
[Google Play](#)

- Developed and published a weather application on Google Play providing real-time data, multi-day forecasts, and geolocation using REST APIs.

QUIZ
AI Quiz Game

Jul 2024
[Github](#)

- Built a quiz application with multi-level challenges, category-based quizzes, and local data storage using SQFlite.

iClick
Social Media App

Jun 2024 – Jul 2024
[Github](#)

- Developed a social media app supporting posts, reels, and stories with a Laravel backend, SQL database, and Firebase Cloud Messaging for push notifications.

DarkStore
E-commerce App

Dec 2022 – Jan 2023
[Github](#)

- Built a full-featured e-commerce mobile app using Flutter with a Laravel backend, integrating REST APIs, Paymob payment gateway, and Google Maps services.

DarkChat
Chat Application

Feb 2022 – Mar 2022
[Github](#)

- Developed a real-time chat application using Flutter and Firebase with authentication, group chats, and Bloc state management.

Education

Bachelor’s in Systems and Information

2021 – 2025
